

Editorial

We have some good and interesting articles in the last and present journal. In the original articles we have impact of hematology laboratory accreditation on patient care and hematological parameters in cirrhotics, PAP's smear study and its utility in cervical cancer screening in a tertiary care hospital, and in another study its estimation with significance endometrial histopathology for latters morphology, bleach digestion of sputum for better detection of AFB in Pulmonary Koch's, histopathological spectrum of skin diseases in tertiary care centers from Maharashtra region and skin with adnexal tumor in a tertiary care hospital, unusual sites of fibro epithelial polyps with review of literature, FNAC comparative study with ultrasound in thyroid lesions, and FNAC of its comparison with Bethesda system, Principles and shortcomings in Mycosis fungoides and its further modifications, Clinico-histopathological study of GIT Polyps, histopathology of bone lesions at a tertiary care hospital and Hormonal receptors in breast cancer and its relation to prognosis. We also studies breast FNAC with diagnostic accuracy etc.

We had articles on seminal study parameters in infertile men, computed tomography guided percutaneous FNAC of lung lesions, scoring of micronuclei in FNAC of breast cancer and histopathological spectrum of soft tissue tumors in rural population. Lastly, a rare case of chondromyxoid fibroma of the maxilla.

Weather is changing fast and so is global temperature-all manmade activities playing with nature. See in the month of March we are having snow fall in north hills like J & K, Himachal and Uttrakhand. So, we will have extreme cold and hot in our country in the coming months. Similarly, in the Western world we are having heavy snow fall in the current month, which is very unusual. Life is paralysed in USA, Canada, Germany, England etc. etc. due to all manmade activities playing with nature.

In Delhi and other Indian big cities we are having unusual viral fever with URI. We have to work together to prevent this natural calamities.
