

Editorial

We are having very good articles in last issue of March and coming issue of April. In the original articles in the last issue that too tertiary centers, we have articles like H.P. of non-neoplastics skin biopsy lesions of 142 cases, H.P. of surface epithelial tumor of ovary at a tertiary hospital, H.P. Study of spectrum of neoplastics and non-neoplastics lesions of kidney, and H.P.- a case report of Adenosquamous variant of meta plastics carcinoma of breast.

FNAC in subcutaneous cysticercosis, clinic-pathological profiles, diagnostic utility of body fluid cytology, HIV positive blood donors at Pondicherry-a author's past hospital i.e. JIPMER Pondicherry, Distribution of ABO and Rh blood group in central India a retrospective study, FNAC of liver mass with Radiological diagnosis, Accuracy of endometrial aspiration with comparison of cyto morphology of aspiration with H.P., correlation between platelets volume and cause of Thrombocytopenia in hospital base study, and autopsy study of liver pathology in cases of maternal deaths.

Mast cells in contact and atopic dermatitis, tertiary case study of papillary lesions of breast, immuno histochemical study of papilloma virus 16 (HPV 16) expressions in the various types of carcinoma cervix in the rural population of Tamil Nadu, tubercular bacilli positivity in lymph node in the three years study at Mandya Medical College Karnataka, and touch cytology in Helicobacter pylori in non ulcer dysplasia cases.

Weather is getting hot, temperature of Delhi is 44-46°C, again a man made environmental change. The entry of Nipah viruses from Malaysia by bats and pigs to human beings caused deaths in Bangladesh, West Bengal, and recently about 10 deaths in Kerala. So take precautions.
