Abstract

Suryaprabha Vati is a novel herbo-mineral formulation prepared by Swami Kanhaji. It can treat all kind of human disease. During the extensive surveys on Monk wisdom based on plants under the text Monk Botany; the formulations pertaining to above Vati has been disclosed by Swamiji. The Chandraprabha Vati has been mentioned in Bhaisajya Ratnavali. However, there is no description of Suryaprabha Vati in any classical literature of Ayurveda.

Keywords: Suryaprabha Vati, Monk Botany, Novel herbo-mineral formulation

Introduction

India is the spiritual land. In Indian subcontinent, the spiritual saint and rishis like Charak, Shusruta have discovered the medical wisdom of Ayurveda. The saints or sidhas and tapswis are one of the strong representatives of medicinal-lore of India. Through the incantation, religious and spiritual practices of yoga and awakening of kundalini, they achieve some super natural power which may not be completely described in words except practical feelings. Suryaprabha Vati is a formulation of novel herbo-mineral composition prepared by a great Saint Vedavid Balmahayogi Sawmi Kanhaji who has been honored by the National

award as Shrestha Bhartiya Gyani Balak by Govt. of India in 2002. At present he is living at Panchveda Mahavidyapitham, district Angul. Orissa. He is well versed to speak on any vedic mantra and Yoga. His keen and sincere interest is to link between Ayur science and Yogic science.

The formulation

The Suryaprabha vati is a novel formulation which has been invented by Swami Kanhaji. The pills may be prepared equivalent to weight of a gram seed or 1gm. may cures almost all kind of human diseases and disorders if taken in night or early morning with milk as per claim of Swamiji. The ingredients for the formulations are viz. about 50 gm. each powder mixture of root of 'Chitrak' (*Plumbago zeylanica*), 'Mulheti' (*Glycyrrhiza glabra*), 'Nagarmotha' (*Cyperus scariosus*), 'Kutki' (*Picrorrhiza kurroa*), 'Chavya' (*Piper retrofractum*), heartwood/extract of 'Nimba' (*Azadirachta indica*), 'Patolptra' (*Trichosanthes dioica*), bark of 'Dalchini' (*Cinnamomum zeylanicum*), androceium of 'Nagkesar' (*Mesua ferrea*), 'Amla vetas' (*Salix tetrasperma*), whole plant of 'Chirayta' (*Swertia chirayta*), twigs of 'Bharangi' (*Clerodendrum serratum*), 'Padama katha' (*Prunus cerasoides*), seeds of 'Khursani' (*Trachyspermum ammi*), Pipali (*Piper longum*), 'Kalimirch' (*Piper nigrum*), 'Nisoth' (*Operculina turpethum*), 'Jamalgota' (*Croton tiglium*), 'Kachur' (*Hedychium spicatum*), 'Pushkarmual' (*Inula racemosa*), 'Devdaru' (*Cedrus deodara*), 'Tamal Patta' (*Garcinia morella*), 'Kurachhal'
